

Environmental Policy

- We care about our planet and its environment, we believe in looking after our nature and ecology and treat it as a right practice, which is imbibed by the senior management to all the employees and that is the reason why we have an environmental policy in place to ensure all our business activities adhere to the rules and regulations
- We provide a healthy atmosphere where our employees are trained and follow all health and safety regulations in day to day operations and in emergencies.
- We encourage for new ideas and innovations to be integrated and incorporated in our business model to contribute to the improvement of the environment.
- We comply and practice all legal requirements that are to be followed.
- We are committed to reduce waste and adhere to high standards by preventing pollution, we try and re-use things wherever applicable and dispose of re-cyclable items in a proper and a proven way.
- We avoid travel which is not essential and also communicate by the electronic means (E-mail. Tele conference...) and reduce paper usage.
- We consider environment related factors like water and energy saving, whenever we plan a new office or re-furbish an old one.
- We also established a new process, where in we can review our stance on the commitment periodically and make amends accordingly to strive for excellence.
